

ENTREX CARBON MARKET BACKGROUND:

The Entrex Carbon Market was founded to create an efficient, regulatory compliant, platform to buy, sell and retire Carbon Offset Securities.

Today our regulatory compliant trading platform provides an efficient solution to buy, sell and retire verified, securitized, carbon offsets.

ENTREX CARBON MARKET JOINT VENTURE:

The Entrex Carbon Market was created through the execution of a

Letter of Intent Agreement which created a joint venture between the Entrex Capital Market, LLC and Universal Solar Technology Corp (OTC:UNSS), a public company.

The mission of the joint venture is to bring capital and technology together using Entrex's proven IBM Hyperledger technology to bring safety, security and efficiency to the trading of environmental securities. Press release available [click here](#).

NET ZERO ANALYSIS:

Net Zero works together with Entrex to reduce carbon emissions through renewable energy market transformation.

Working with international offset verifiers and producers Net Zero Analysis helps entities gain access to the Entrex Carbon Market and assisting in professional origination; maximize visibility and placement.

CLEAN DEVELOPMENT MECHANISM:

The CDM allows emission reduction projects in developing countries to earn certified emission reduction (CER) credits, each equivalent to one tonne of CO2. These CERs can be traded and sold, and used to meet a part of their designated emission reduction.

Wind power project at Jaibhim by SIIL

Serum Institute of India (SIIL) is a manufacturer of immune-biologicals, including vaccines in India. It was incorporated in the year 1984. The company is managed by the Poonawalla group. Today, Serum Institute of India Ltd. has established itself as the world's largest producer of Measles and DTP group of vaccines.

With the growing concerns for the environment, Serum Institute of India Ltd. (SIIL) has undertaken measures to reduce the GHG emissions by conceptualizing and installation wind power project in Maharashtra with efficient utilization of the available wind energy. 16 WTGs were commissioned with all generated electricity wheeled to substations through a 33 kV overhead line.

The generated electricity will displace equivalent electricity that may have been produced majorly from conventional fuels (generally, fossil fuels). The projects are located at village Jaibhim, Dhule District of Maharashtra State in India.

The project leads to an annual emission reductions of 52,898 tCO2e per annum. The first WTG under this project has stated commissioning since 11-March-2011 and has been under operation since then except for regular shutdowns considering O&M requirements. The project was registered at UNFCCC (Ref. No. 6456) on 28-Nov-2012 and the details of the same can be viewed at: <https://cdm.unfccc.int/Projects/DB/LRQA%20Ltd1340102581.62/view>

Net Zero Analysis has been assigned specific carbon Offsets from the registry and listed them on the Entrex Carbon Market.

JAIBHIM BY SIIL - ENTREX CARBON MARKET SECURITIES:

Each certificate represented on the Entrex Carbon Market represents 1000 of the indicated offsets and is priced accordingly. Documentation: [JAIBHIM by SIIL DealBox](#)
